

Whispers in the Stacks

A Fate's Edge Horror Campaign
Mixing Thepyrgos and Horror Generators

Campaign Overview

Campaign Hook

The Premise: The PCs are scholars, researchers, or investigators who have been drawn to the ancient University of Thepyrgos, renowned for its vast archives and the mysterious Synod Hall where "judgment [is] audible at a whisper." They've come seeking knowledge, but find instead that the very architecture of the city seems to harbor dark secrets.

Real Hook: The University's ancient towers and labyrinthine stacks conceal more than forgotten texts. Something has awakened in the spaces between knowledge—perhaps connected to the "General watch" that once seized carts "for the walls." The whispered judgments in Synod Hall are no longer just legal proceedings, but something far more sinister. The entity feeds on the accumulated fears and secrets of centuries of scholars, students, and seekers who have passed through these halls.

Custom Horror Mechanics

Special Campaign Mechanics

The Whispering Mechanic: When in the ancient towers or stacks of the University, PCs must make Wits + Lore rolls (DV 3) to resist hearing the entity's whispers. Each failure:

- Generates 1 CP that the GM can spend for psychological effects
- Advances Dread Clock by 1 segment (prevent with 1 Boon)
- May reveal useful but disturbing information

Whisper Examples:

- "The books remember your name..."
- "Knowledge has a price..."
- "The Matriarch waits for you in Synod Hall..."
- "Your companion's thoughts are not their own..."

Sacred Geometry Perception: When PCs observe the ancient architecture of the University, particularly in Synod Hall or the older towers, they must make Wits + Investigation rolls (DV 4) to avoid comprehension effects. Each failure:

- Generates 2 CP that the GM can spend for reality distortions
- Advances Dread Clock by 2 segments (prevent with 2 Boons)
- May grant forbidden knowledge at great psychological cost

Geometry Manifestations:

- Corridors that should be straight but bend impossibly
- Rooms that are larger on the inside than the outside
- Symbols that shift when not directly observed
- Stairs that lead to different floors depending on the direction of approach

Knowledge Corruption: PCs who reach 7+ Dread segments begin to show physical signs of the entity's influence:

- Eyes that reflect unusual colors in darkness
- Speaking in whispers without realizing it
- Attraction to dark, enclosed spaces like the ancient stacks
- May be able to communicate with the entity through forbidden knowledge

Corruption Effects:

- +1 die to Lore rolls involving forbidden knowledge
- -1 die to social rolls due to unsettling presence
- Can perceive multiple timeline branches (generates 2 CP per scene)
- Permanent reality distortion (narrative consequence)

The Collective Dread: The party's collective Dread affects their perception of the University:

- Average Dread level determines reality stability
- High average = shared hallucinations, impossible events become real
- Low average = grounding effect, some resistance to cosmic influence

Collective Effects:

- Shared visions of the entity's true form
- Impossible architectural changes that affect all PCs
- Collective memory gaps about recent events
- Enhanced group paranoia and infighting
