uge **Fate’s Edge** — **Player’s Cyclopedia**
The road remembers. Every choice carries weight.

0.5ex
rule

1. The Core Loop

When you attempt a risky action:
 tem **Declare** intent approach (Attribute + Skill). tem **GM sets** Difficulty Value (DV) and Position. tem **Roll** dice pool: Attribute + Skill d10s. tem **Count Successes**: each die 6 = 1 success. Each die = 1 = 1 Story Beat (SB) for the GM. tem **Compare** successes to DV → use Outcome Matrix. tem **Apply** outcome; GM spends SB for complications.

2. Difficulty Value (DV)

DV 2	Routine, al- most guar- an- teed
DV 3	Pressured (de- fault), mild op- po- si- tion
DV 4	Hard, se- ri- ous re- sis- tance
DV 5+	Extreme, dra- matic gam- ble

3. Position (Risk)

	Dominant	Reroll one failure
linewidth	Controlled	No rerolls
You may spend 1 Boon to improve Position by one		
	Desperate	Reroll one success
step before rolling.		

4. Outcome Matrix

	Clean Success	successes DV, SB = 0: intent achieved, no complication.
	Success with SB	successes DV, SB > 0: intent achieved; GM spends SB for a twist.
linewidth	Partial	0 < successes < DV: progress made; you gain 1 Boon.
	Miss	successes = 0: no

5. Boons (Player Currency)

tem **Hold up to 5.** At end of scene, reduce to 2 (excess lost). tem **Earn:** Partial (1 Boon), Miss (2 Boons), bonddriven action, GM award. tem **Spend 1 Boon to:**tem Reroll a single die after seeing the pool. tem Improve Position by one step before rolling. tem Activate an onscreen Asset. tem Convert 2 Boons ß 1 XP (once per session, max 2 XP).

6. Story Beats (GM Currency)

Each die = 1 you roll gives the GM 1 SB. GM spends SB to

1 SB Minor:

noise,
tick
a
timer,
small
set-
back.

2 SB Moderate:

alarm
raised,
lose
ad-
van-
tage,
worsen
Po-
si-
tion.

complicate the scene: linewidth

3+ SB Major:

re-
in-
force-
ments,
scene
shift,
break
an
as-
set.

7. Fatigue Harm

Fatigue: Each point worsens your Position (Dominant & Controlled & Desperate). If already Desperate, each Fatigue imposes 1 die.

tem Fatigue track size = Body. When track fills & increase Harm by 1, clear all Fatigue. tem Short rest (1 hour) removes 2 Fatigue. Full night’s rest removes all.

Harm 1 1
die
on
re-
lated
ac-
tions

Harm 2 1

Harm: linewidth Taking Harm die clears all existing Fatigue (the on most ac- tions

Harm 3 Incapacitated
or
dy-
ing

“rollercoaster” effect).

8. Combat Quick Reference

tem **Turn:** 1 Action + 1 Move. Move shifts one range band (Close Near Far). tem **Opportunity Attack:** Leaving Close range without Disengage provokes one free melee attack. tem **Sidestrike:** Move one band as part of a melee attack; worsen Position by one step. tem **Shove:** Opposed Body+Athletics; push target one band. tem **Grapple:** Opposed Body+Melee; both Engaged; target

suffers 1 die.

9. Essential Skills (Abridged)

Combat: Melee, Ranged, Brawl, Tactics.
Physical: Athletics, Stealth, Endurance, Craft, Survival.
Social: Sway, Command, Deception, Performance, Insight.
Knowledge: Lore, Investigation, Medicine.
Magic: Arcana, Ritual.

10. Making a Roll – Example

Dice pool = Attribute + Skill.
Success on 6+, SB on 1.
Example: Body 3 + Melee 2 = 5d10. Roll: 6,4,3,1,10 → successes: 6,10 (10 counts as two) = 3 successes. SB: one 1 → 1 SB.

11. Quick DC Effect Guidelines

DV 2	Routine, al-most guaranteed.
DV 3	Standard pressured action.
DV 4	Hard, se-
linewidht Effect (scope of success):	Limited (minor), Stan-
	ri-ous op-po-si-tion.
DV 5+	Extreme, dra-matic gam-ble.
dard (expected), Great (major).	GM sets Effect based on fic-tion.

12. Critical Success (10s)

A roll of 10 counts as two successes. If the overall roll succeeds:
tem **One 10:** Strong success – improve Position on next action or gain minor advantage. tem **Two 10s:** Exceptional – choose two benefits. tem **Three 10s:** Legendary – clear 1 segment from a relevant timer.

A 10 is never rerolled, even by Position effects.

13. Boons vs. XP – A Reminder

Boons are dramatic fuel, not XP tokens. Spend them freely to reroll, improve Position, or activate Assets. Hoarding Boons for conversion (2 Boons ß 1 XP) slows the table’s momentum.

rule

The real reward is agency, not a trickle of XP.

14. Golden Rule

When in doubt, make the choice that serves the story. If you cannot remember a rule, default to **DV 3, Controlled Position**, and let the dice fall.
