

Political Intrigue Campaign Framework

for *Fate's Edge* — Version 0.3 (Expanded)

Design Goals

- **Why:** Enable long-form play focused on courts, city-states, guilds, and synods where choices echo across seasons.
- **Mechanical Need:** Formalize social conflict and faction play using existing engines (Position, DV, SB, clocks).
- **Narrative Richness:** Turn every roll into a living thread—alliances, scandals, mandates, and crises.
- **Player Appeal:** Provide levers (Favor, Leverage, Reputation, Strings) without heavy book-keeping.

Principle: This module adds procedures, not new math. Use core rules for rolls; this tells you what to prep, track, and tick.

Quickstart (2 minutes)

1. Pick a **Seat of Power** (city, court, guildhall, synod).
2. Create **3–5 Faction Sheets**. Give each faction an **Influence** clock [6], an **Exposure** clock [6], and a **Stability** clock [6–8].
3. Place **Campaign Dials**: *Mandate* and *Crisis* at 2 (0–6 each) unless fiction says otherwise.
4. For each session, declare a **Situation Clock** [4–8] for the immediate political question.
5. Play scenes. Any **1s generate SB**; the GM uses *Social SB options*.
6. Between sessions, run the **Intrigue Cycle** to advance clocks off-screen and seed the next scandal.

Contents

1	Faction Play: Components & Templates	3

7	Long-Term Campaign Management	8

Faction Play: Components & Templates

Faction Sheet (Template)

[FACTION NAME]

Tier: (street / guild / city / crown / synod)

Aim: (what they want this season)

Stance toward PCs: (Allied / Wary / Hostile)

Levers (3): (money, law, clergy, blades, secrets, ships, votes, rites...)

Leader & Lieutenants: (names + one sentence intent)

Reputation Tags (2): (Merciful, Ruthless, Old-Blood, Reformers, Ascetic...)

Clocks:

- Influence [6]: how aligned they are with PC aims; fills to grant access/patronage
- Stability [6{8]: how coherent the faction remains; fills → schism/coup/purge
- Exposure [6]: public risk & scandal; fills → scandal event triggers

Holdings/Assets: (2{5 named assets with a sentence of function)

Strings: (1{3 hooks tying them to locales, laws, rites, or other factions)

When to tick (with examples)

- **Influence:** Tick when PCs advance or protect the faction's *stated Aim* or humiliate an *active rival* of that Aim. (e.g., secure a river charter the Harbor Guild wants = +1; discredit the Tide-Chart Office opposing them = +1.) Routine gifts without movement on the Aim do not tick.
- **Stability:** Tick when internal strains surface beyond normal bickering: succession wobbles, ideological schism, budget shortfalls, a key lieutenant defects, or magical overreach taxes rites/logistics. (e.g., failed purge = +1; whispered heresy in the Ember-Temple = +1.)
- **Exposure:** Tick on visible missteps: public concessions/humiliations, failed high-profile actions (especially with Social SB spends), leaks of leverage, or collateral harm to bystanders. (e.g., bribery discovered = +2; foiled blackmail exposed = +1.)

Strings — What They Do

A **String** is a concrete tie: "Controls river tolls," "Holds three Synod votes," "Custodian of the Lantern Rites," "Patron of the Playhouse."

- Acting *with/through* a relevant String: improve **Position** +1 *or* treat **DV** as -1 (once per scene).
- Acting *against* a target's String: **Position** -1 *or* GM banks +1 SB.
- Cutting or seizing a String is a **4–6 segment clock**; on fill, move the String to the victor or strike it.

Relationship Map (Strings & Stakes)

Sketch the web. For every arrow between two factions, write a **stake** (e.g., "river tolls," "chapter-house votes," "forbidden codex"). Mark two arrows **volatile**; these will pop first under pressure.

Volatility Triggers

- When either linked faction's **Exposure** fills, immediately trigger the volatile stake as an on-screen complication or new Situation clock.

- When **Crisis** rises by 1, the GM may trigger one volatile arrow anywhere on the map.
- A targeted **Social SB** spend may flip a volatile stake early (GM choice; announce loudly).

Map-to-Action Hooks

- Acting along an arrow where you have **positive Strings** on either node: **+1 Position** or **DV -1**.
- Acting against a node with **negative entanglement** (Hostile stance or disgraced tag): **-1 Position** or GM banks +1 SB.
- These are caps; do not chain multiple arrows for stacking.

Campaign Dials

Mandate (0–6) Table’s public legitimacy and door-opening power.

Crisis (0–6) Pressure from rivals, costs, and backlash. Set both to 2 at start unless fiction says otherwise.

Mechanical Hooks

Mandate

- 0–1: Cold reception. Public venues start **Desperate** unless you bring Favors/Strings.
- 2–3: Recognized. Once per social scene, treat Position as **one step higher** when invoking a relevant Favor or String.
- 4–5: Credible power. Once per session, **cancel** one Social SB spend targeting you in public venues; public institutions set **DV -1** versus your petitions.
- 6: Standard-bearers. Start public scenes **Dominant** unless fiction strongly opposes; your endorsements create a 4-clock *Bandwagon* on targets.

Crisis

- 0–1: Calm waters.
- 2–3: Tension. At the start of each session, GM banks +1 SB for political scenes.
- 4–5: Boiling. First failed social action each session ticks party **Exposure +1**.
- 6: Breaking point. Start political scenes with a **Counter-Clock [4]** in play.

Scene Procedures for Social Conflict

Social Conflict at a Glance

1. **Intent** → **Position/DV** → **Roll** → **Outcome** → **Ripple**.
2. Set Dominant/Controlled/Desperate and DV from fiction. **Any 1s generate SB** in social scenes.

Intrigue Actions (examples)

Each uses the table’s attribute/skill combination. Suggested positions/DVs and on-hit effects below.

- **Petition (Presence+Sway):** Present a case to a decision-maker. Dominant with writs/favors; Desperate when hostile. DV 2–4. Hit: fill Situation; strong hit: tick ally Influence.

- **Bribe (Wits+Streetwise/Lore):** Move resources to open doors. Dominant; worsens if watched/holy ground. DV 2–3. Hit: create a temporary tag (*Greased Palms*); miss: tick Exposure.
- **Blackmail (Wits+Investigation):** Apply leverage. Dominant → Desperate if unverified. DV 3–5. Hit: concession now or place a 4-clock *Compromise* usable later for Position Dominant.
- **Broker (Presence+Diplomacy):** Reconcile two parties. Dominant on neutral ground; Dominant with ritual hospitality; Desperate if blades present. DV 3–4. Hit: reduce both parties' Exposure by 1; fill Influence for the favored side.
- **Expose (Presence+Performance):** Publicly reveal truth/forgery. Dominant with corroboration; Desperate with hearsay. DV 3–5. Hit: add *Disgraced* tag; fill 2–3 segments on target Exposure.
- **Shield (Wits+Tactics/Lore):** Pre-empt rival plays via law/protocol/counter-messaging. Dominant; Dominant with counsel/rites. DV 3. Hit: reduce incoming Social SB by 1 this scene; mark ally Stability -1 (cohere under pressure).
- **Host Feast/Vigil (Presence+Performance/Rite):** Gather elites; set tone. Dominant if traditions observed; Desperate if taboo. DV 2–4. Hit: create Audience tags; if triumph, *Mandate* $+1$.
- **Infiltrate (Body/Wits+Stealth/Deception):** Plant evidence, steal ledgers, ghost a meeting. Desperate when warded/sanctified. DV 3–5. Hit: gain *Leverage (1)* or fill Situation; on partials, start a *Security* or *Rumor* counter-clock.

Social SB Options

When 1s appear, GM spends SB to:

- Trigger faux pas; spread rumor; demand concessions; rival interjects; gallery turns; patronage flips.
- **Currency hits:** lose 1 Favor with an implicated institution; a used Leverage becomes public (tick either party's Exposure $+1$); shift an Audience/Institution tag against the PCs.

Resolution

A scene resolves when the **Situation Clock** fills or fiction dictates. Then ripple:

- Advance/reduce involved **Faction Clocks** (Influence/Stability/Exposure).
- Adjust **Mandate/Crisis** (usually ± 1 each based on victory and visible costs).
- Record lasting **Audience/Institution Tags**.

Situation vs. Faction Clocks — Default Ripple

- **Success (PC-favoring):** Allied *Influence* $+1$ (or $+2$ if it advances their Aim); if win was clean, allied *Exposure* -1 ; hostile *Exposure* $+1$.
- **Failure (PC-hurting):** Opposing *Influence* $+1$ (or $+2$ if on-Aim); allied *Exposure* $+1$. If failure was internal, also tick that faction's *Stability* $+1$.
- **Compromise:** Each side *Influence* $+1$ or both *Exposure* $+1$, guided by fiction.

The Intrigue Cycle (Between Sessions)

Use once per session (or per in-fiction week/month on jumps).

Step A — Update World State

For each active faction, advance *Stability* or *Exposure* by 1 if they suffered public pressure or internal strain. Tick unresolved thread clocks by 1 or start a 4–6 clock.

Step B — Draw/Prompt for Events

Method: Draw blindly from a standard deck or deliberately pick suits matching themes. Use **Suit** for type (Hearts=court/crowd; Spades=violence; Clubs=resources/strikes; Diamonds=environment/omens) and **Rank** for severity (low=+1, mid=+2, face/ace=+3 segments).

Apply: Place each card on a faction/clock and immediately tick by severity; write one sentence of fallout that must surface next session.

Examples: Hearts 7 → public oath/romance, tick *Exposure* +2. Clubs 10 → trade shock/strike, start a 6-clock *Shortages*.

Step C — Off-Screen Actions

Each PC directs one off-screen move using a follower/asset/network. Resolve with one roll at *Significant Time* scale; on 1s, bank SB and/or tick *Exposure*.

Step D — Recompute Dials

If wins were visible and valued, **Mandate** +1. If costs, scandals, or riots mounted, **Crisis** +1. Both may move.

Step E — Prep Next Situation

Name the next immediate political question. Put a 4–8 clock on it. Grab 2–3 complications tied to factions and prior tags.

Currencies: Favor, Leverage, Exposure, Reputation

Favor (Table Currency)

Earn a Favor when you deliver visible benefit or save a leader's face. Spend a Favor to:

- Improve Position by one step *against that person/institution*.
- Cancel one Social SB spend aimed at you in their venue.
- Access a restricted office/archive/sanctum once.

Favors are narrow; specify scope (“Harbormaster’s Office,” not “All of Kahfagia”). Three unspent favors from the same seat convert to **Standing (Tag)** with them.

Leverage (Portable)

- One **Leverage (1)** forces a concession (1 segment on a Situation Clock) *or* holds Position at Dominant when it would drop to Desperate.
- **Decay:** Only *public* uses count. After two public uses of the same leverage, convert it to *Exposure* +1 on you or the target (your choice). Private uses do not decay it, but three private uses make it stale; refresh with new proof/witness/circumstance before it functions again.

Exposure (You & Them)

Track **Exposure** [6] for the party (or per face) and on major factions. When a track fills, trigger a **Scandal Event**: public censure, hostile audit, inquisitorial summons, riot, duel demand, etc. Clear 2 on a successful *Shield* scene or by accepting a humiliating concession on-screen.

Reputation Tiers

Check at arc end (or every 2–3 sessions). If two are true, advance Reputation Tier:

- Convert 3 favors from one institution into **Standing (Tag)** or hold Standing with two institutions.
- End with **Mandate** ≥ 4 or resolve a city-scale Situation Clock [8] in your favor.
- Your deeds create/resolve a *regional law/rite* or seat/remove a leader.

Gatekeeping Effects: Higher tiers grant default access to higher-tier factions/venues; DVs for petitions to lower-tier offices drop by 1; clocks scale up (use 6–8 segments at higher tiers; 4–6 at low tier). When your tier outstrips a scene’s stakes, the GM may simply hand you the room unless opposing Strings/Leverage are present.

Followers & Assets in Politics

On-Scene

Assign a follower to Assist or to take an independent scene action with its own risk. Harm to followers often lands as *Stability* or *Exposure* ticks on their home faction.

Off-Screen Orders (Intrigue Cycle)

Each PC may direct one follower/asset on a *Significant-Time* operation (surveil, seed rumors, counter-bribe, audit a ledger, escort witnesses). This can occur mid-adventure as a cutaway or between sessions. Resolve with one roll using the follower’s capability as positioning; on a hit, apply 1–2 segments to the intended clock; on 1s, bank SB and mark *Exposure +1*.

Upkeep & Entanglements

Track names, not ledgers. When the GM spends 2+ SB in a political arc, an ally may face the consequence instead (compromised informant, bribed clerk, stolen seal). Convert entanglements into new *threads* and *clocks* rather than binary losses.

Generators (Scandal Decks & Prompts)

Suits as Political Color

Hearts: court favor, marriages, oaths, crowd mood.

Spades: violence, duels, arrests, street pressure.

Clubs: resources, trade shocks, supply, strikes.

Diamonds: environment, festivals, omens, disasters.

Ranks as Severity

Low (2–5): gossip/minor obstruction (+1 segment).

Mid (6–9): scandals, votes, riots, inquisitors (+2 segments).

Face/Ace: institutions shift; laws change; thrones wobble (+3 segments; start/finish a major clock).

Draw Procedures

Quick Hook (2): what’s the scandal, who is entangled?

Full Seed (4): place each onto a faction/clock; one-sentence fallout per card.

Act Builder: Establishment → Escalation → Resolution; note which clocks must move.

Worked Examples

- **Hearts 7:** A scion’s oath of love becomes public; tick *Exposure +2* on their house; start a 4-clock *Secret Betrothal*.
- **Spades King:** A duelist challenges the Tide-Marshall; start a 6-clock *Public Blood*; if it fills, *Mandate -1* for the city guard.
- **Clubs 6:** Dockworkers strike; tick Harbor Guild *Stability +1*; create tag *Pickets at Dawn*.
- **Diamonds 9:** Omens sour during a procession; tick *Exposure +2* on the Ember-Temple unless rites appease it.

Long-Term Campaign Management

Running a multi-arc intrigue campaign requires pacing and player investment. Use these additional tools.

Seasonal Arcs

Each arc (4–6 sessions) should focus on a single **Seasonal Aim** for the party (e.g., “Seat an allied candidate”, “Expose a treasonous conspiracy”, “Negotiate a trade treaty”). At the end of the arc, the party may:

- Permanently increase **Mandate** by 1 (if the aim succeeded and was visible).
- Gain a **Legacy String** (a permanent tie usable once per arc).
- Convert a major rival faction’s **Influence** clock into a **Debt** on them.

Faction Rivalry Clocks

In addition to Influence/Stability/Exposure, you may track a **Rivalry Clock [6]** between two factions. Each time one faction publicly humiliates the other, tick the clock. When full, a decisive confrontation occurs (duel, vote, raid, trial). The PCs can influence the outcome by spending Favors or Leverage.

Managing Downtime

Between arcs, run a **Downtime Phase** where players narrate their characters’ activities (3–5 scenes). Each activity:

- Restores a resource (Favor, Leverage, or clears Exposure).
- Advances a personal project (gaining a new String or improving an Asset).

- May trigger a **Personal Complication** (GM banks 2 SB for the next arc).

Blood on the Belworth

A Political Intrigue adventure for Fate's Edge using the v0.3 framework

DUKE Braedon Fenwood, the last of the old Valvano line, has just died. His sons — the cautious Constano (heir) and the martial Seniro — now struggle to maintain House Fenwood's power on both sides of the Belworth River. The succession crisis of Viterra festers: Queen Veralyn Demoneye's throne is contested, and the Vhasian Regency sees opportunity. In the midst of this, a ferry is found adrift with three stabbed corpses and a Fenwood quartermaster's armband nailed to the mast. The river turns to rumor, and the old duke's final words echo: "*Count exits before enemies. The road reschedules.*"

Timeline Note (GM Eyes Only)

The Fourth Sack of Ecktoria (c. 620 AR) occurred seventy years after the Third Sack and the Valvano exile. The events of *The Exile Road* and *The Nameless* take place around that era. Braedon Fenwood lives centuries later, after the Tarling kings have fallen, the Fenwoods have risen to ducal status, and the Everbloods have taken the crown. The debt foreshadowed in *The Exile Road* was paid long ago. This adventure deals with the *consequences* of those ancient choices: the Black Scrip indemnities, the ghost of the Thornhill child, and the Aeler keystone rights.

Using This Adventure

This module is built on the Political Intrigue Campaign Framework (v0.3). Run each major question with a Situation Clock (4–8) and at least one Counter-Clock (4–6). Use Strings to tune Position/DV and as prizes/failure states. Apply Mandate/Crisis dials and the Situation→Faction Ripple rules after each scene.

Intended length: 2–4 sessions. **Tone:** border-court drama, false flags, rites of hospitality, hedge-law wrangling. **Prerequisite:** The adventure assumes the events of *The Old Duke's Wars* (vignettes of Braedon's life) have recently occurred. The party may have played those vignettes, or the GM can narrate the key beats.

Seats, Locales & Assets

- **Tarlington (Viterra):** Ducal seat; marble halls, Hedge-Law Moot Court, lantern beacons along the river stairs. Old Braedon's solar now holds his Canray board and a sealed letter.
- **Belworth River Corridor:** Ferry towns, reedmarshes, customs towers, lantern-law posts, ruined Tarling fortlets.
- **Lence (Vhasia):** Half-rebuilt after the sack; Restorationist salons; a palace-in-exile flavor.
- **The Red Span:** A half-finished Aeler bridge across the Belworth; a scandal of budgets and graft. The Aeler True Masons have a dormant keystone clause that could swing control.
- **Lantern-Rites House of Oria:** Neutral ground by custom; oaths, feasts, and river burials are sanctified here. Sister Oria was a confidante of old Braedon.

Named Assets (examples):

- Ferry Passbooks (who may legally cross at dusk)

- Tarler's Seal (ducal customs stamp)
- Ledger of Tithes (grain barges)
- Lantern-Rite Basin (ritual hospitality)
- The Black Scrip (indemnities owed by Lence after the Sack)
- Red Span Budget Roll (inflated contracts)
- **Braedon's Canray Board** (a slate with an unfinished game; the positions reveal hidden alliances)

Factions (Sheets)

House Fenwood (Viterra)

Tier: crown

Levers: blades, law, tolls, Canray wisdom

Reputation: Old-Blood, Stern

Clocks: Influence [6], Stability [8], Exposure [6]

Strings: Custodian of the Lantern Beacons; Controls Red Span work crews; Holds oaths of three ferry captains; *

Vhasian Regency Council

Tier: crown

Levers: law, clergy, spies, ancestral grievances

Reputation: Restorers, Grievant

Clocks: Influence [6], Stability [6], Exposure [6]

Strings: Custodian of the Black Scrip; Holds exile petitions; Sanctions river pilgrimages

Aim: Cement a success

Leaders: Lady-Envoy M

Lantern-Rites Custody (Neutral Clergy)

Tier: synod

Levers: rites, hospitality, crowds

Reputation: Merciful, Unbending in ceremony

Clocks: Influence [6], Stability [6], Exposure [6]

Strings: Neutral Sanctum of Hospitality; Funerary authority on the Belworth; Oath-tablet registry

Aim: Keep

Leader: Sist

River Syndicate (Pilots & Ferrymen)

Tier: guild

Levers: ships, tolls, rumor, fog-sense

Reputation: Practical, Superstitious

Clocks: Influence [6], Stability [6], Exposure [6]

Strings: Ferry Passbooks; Night-lantern routes; Smuggler hush-oaths

Aim: Profit from stability and exemptions

Leader: Captain Pell Rivermark

Red Span Contractors (Graft Bloc)

Tier: merchant
 Levers: coin, labor, saboteurs, counterfeit ledger pages
 Reputation: Gilded, Cut-Rate
 Clocks: Influence [6], Stability [6], Exposure [6]
 Strings: Hold on budget rolls; Union stevedores; Secret pact with Seniro's quartermaster

Aim: Keep funds flow
 Leader: Master Mason

Lence Restorationists (Radicals)

Tier: street→guild
 Levers: crowds, broadsheets, knives, martyrs
 Reputation: Zealous, Wounded
 Clocks: Influence [6], Stability [6], Exposure [6]
 Strings: Printing house in the Reeds; Honor cult of the fallen; List of collaborators (real and imagined)

Aim: P
 Leader:

Relationship Map (Strings & Stakes)

- Fenwood Regency: *Black Scrip indemnities*; **volatile**.
- Fenwood River Syndicate: *Ferry exemptions*; **volatile**.
- Regency Restorationists: *Street muscle vs legitimacy*.
- Fenwood Red Span Contractors: *Overruns & kickbacks*; **volatile**.
- Lantern-Rites Everyone: *Hospitality oaths*.
- Syndicate Contractors: *Work crews & permits*.

Volatility Triggers: Exposure fill on either node; Crisis +1; or a targeted Social SB spend.

Map Hooks: Acting with a positive String on a node → Position +1 or DV -1 (once/scene).

Acting against a hostile node → Position -1 or GM banks +1 SB.

Campaign Dials (Start)

Mandate: 2 (recognized but brittle)

Crisis: 3 (tension after Brightstride's death and the contested succession)

Move them honestly: public wins/losses change access and pressure as per framework rules.

Inciting Incident – “Blood on the Ferry”

At dusk, the ferry *Belworth Grace* drifts to shore with its lanterns guttering. A Vhasian courier and two clerks lie stabbed; a Fenwood quartermaster's armband is nailed to the mast. Survivors whisper conflicting tales. The river turns to rumor overnight.

In Braedon's solar, his Canray board has been moved – the Blue piece is now isolated. Those who see it read a warning: *the king is vulnerable*.

Immediate Situation Clock: [6]: **Contain the Spiral** – keep the border calm for 24 hours.

Counter-Clock: [4]: **Hotheads March** – Seniro's men assemble to cross at dawn.

Counter-Clock: [4]: **Justice Now!** – Restorationists demand arrests at the Lantern-Rites House.

If the PCs do nothing: **Crisis** +1, Fenwood Exposure +1, Regency Influence +1, and the volatile stake *Black Scrip* triggers (audit squads arrive).

Act I – Holding the River

Goal: Prevent escalation; establish an inquest under Lantern-Rites.

Core Scenes (pick 2–3)

Petition at Lantern-Rites Claim neutral inquest rights before Sister Oria. *Position:* Dominant with offerings (a candle, a tithe, a memory of Braedon); Desperate if arriving with blades. *DV:* 3–4 **On hit:** Situation +1–2; Lantern-Rites Influence +1. **On miss:** Exposure +1 (you profane rites).

Shield the Captains Keep Seniro’s hotheads from marching. Use Hedge-Law precedents or Sister Oria’s writ. *Position:* Dominant with Hedge-Law dicta; Dominant if you secure Oria’s seal. *DV:* 3 **On hit:** Counter-Clock *Hotheads March* –1; Seniro grudgingly respects you.

Broker a Truce Arrange a dusk meeting between Regency envoys and Fenwood stewards at Lantern-Rites. *Position:* Dominant if hosting on sacred ground; Desperate if in the open. *DV:* 3–4 **On hit:** Both sides’ Exposure –1; start a concession clock *Shared Inquest* [4].

Infiltrate the Red Span Sneak onto the unfinished bridge to see who planted the quartermaster’s armband. *Position:* Desperate (saboteurs may still be present). *DV:* 4–5 **On hit:** Gain Leverage (1) – “*Seniro’s quartermaster took bribes from Ghio*” – or fill *Contain the Spiral* by 1.

Vignette Echo (from *The Old Duke’s Wars*)

If the party spared the Thornhill child in the vignettes, his ghost appears during infiltration, whispering warnings. This grants +1 die to the roll but adds a **Haunted** condition (Dread +1).

End of Act I: If *Contain the Spiral* fills, Mandate +1. If any counter-clock fills first, Crisis +1 and trigger a volatile arrow (GM’s choice: likely *Fenwood Contractors* or *Fenwood Regency*).

Act II – Ledger and Blood

Goal: Identify the hand behind the ferry murders.

Clue Threads (any 3 lead to the culprit)

1. **Tithe Ledger** – Missing customs stamps the night of the murder (points to Syndicate colluding with Contractors).
2. **Printing House in the Reeds** – Broadsheets were printed hours after the killings (Restorationists prepped the narrative).
3. **Black Scrip Clerk** – The dead courier carried documents for a renegotiation of the indemnity (someone wanted that negotiation to fail).
4. **Quartermaster’s Armband Fibers** – Match a Red Span uniform batch, not Fenwood’s armory (Contractors frame-job).

Likely Culprits (choose one or let players expose one)

- **Ghio’s Contractors** – Staged a false flag to prolong funding and tie Seniro closer.
- **Restorationists** – Struck to collapse any indemnity deal, forcing a hard break.

- **Syndicate Hardliners** – Provoked crisis to win permanent night-route exemptions.

Tip: leave two culprits plausible; the third is a red herring that still moves clocks.

Core Scenes (pick 3–4)

Expose Budget Graft at the Moot Court *Position:* Dominant with corroboration (ledger + witness). *DV:* 4–5 **On hit:** Target faction gains *Disgraced* tag; Exposure +2; Mandate +1 if public.

Blackmail a Syndicate Captain *Position:* Dominant → Desperate if leverage unverified. *DV:* 3–5 **On hit:** Place *Compromise* [4] on the captain (later shift Position to Dominant once).

Host a Feast or Vigil at Lantern-Rites Cool the crowd. *Position:* Dominant if rites observed. *DV:* 2–3 **On hit:** Create Audience Tags (*Warmed, Sobering*); Mandate +1 on triumph.

Petition the Regency to Stay Arrests *Position:* Dominant (you have neutral ground). *DV:* 3 **On hit:** Tick *Shared Inquest* [4] twice; Regency Influence +1 (they respect your diligence).

End of Act II: If culprit identified on-screen and public mood calms, reduce **Crisis** –1 (min 0). On messy wins, tick Fenwood Exposure +1 (your methods smell of law-twisting).

Act III – Judgment on the Water

Goal: Secure a settlement that prevents war, punishes the guilty, and sets the river’s law.

Final Situation Clock: [8]: **Bind the Belworth Accord**

Counter: [6]: *March at Dawn* (if Seniro’s influence is high) or *Honor the Fallen* (if Restorationists are ascendant)

Settlement Options (pick one primary + one concession)

- **Hedge-Law Trial at the River** – Culprit faction yields its leader to a public rite at Lantern-Rites. *Effect:* Mandate +1; culprit Exposure fill → scandal.
- **Indemnity Rescript** – Black Scrip terms renegotiated; Lence gets relief; Fenwood pays in river tolls (not gold). *Effect:* Regency Influence +1; Syndicate gains Standing (Tag) *Night-Routes Deputized*.
- **Red Span Purge** – Contractors ousted; work crews handed to Syndicate and Lantern-Rites oversight. *Effect:* Fenwood Stability –1 (short-term), Mandate +1 (public cleansed).
- **Marshal’s Oath** – Seniro swears to Constano before Sister Oria to obey lantern-law in all crossings. *Effect:* House Stability +1; if broken later, automatic Exposure fill.

Resolution Scenes (choose 2)

- **Broker the Accord** (Presence + Sway, *DV:* 4–5) – Fill *Bind the Belworth Accord* by 2 on success.
- **Expose last-minute sabotage** (Wits + Investigation, *DV:* 3–4) – Prevent a counter-clock advance.
- **Shield the rite from blades** (Body + Melee or Stealth, *DV:* 3) – Protect the ceremony.
- **Petition the Queen’s chancellor to ratify** (Presence + Command, *DV:* 4) – Gain Mandate +1.

Success

If the PCs fill *Bind the Belworth Accord* before the counter-clock triggers:

- **Mandate +1**
- **Crisis -1**
- Apply Settlement effects.
- Advance allied faction Influence +1 (+2 if the settlement directly satisfied their Aim).
- **Braedon's legacy:** The old duke's Canray board is found to have a hidden compartment – inside, a map of Aeler keystone rights that gives the Fenwoods permanent leverage on the Red Span (gain Asset: *Keystone Charter*).

Failure

If a counter-clock fills first:

- A crossing turns bloody. **Crisis +2** (maybe +3).
- Tick House Fenwood Stability +1 (schism risk) and Exposure +1 (butcher tales).
- Rival faction Influence +1.
- The Gray Wanderer appears in the aftermath, shaking his head: “*He counted the exits wrong.*”

Scandal & Event Prompts (use deck)

- **Hearts 9** – River Oath Broken: A ferryman violates hospitality; tick *Exposure +2* on the Syndicate; start *Honor Debt* [4].
- **Spades 7** – Night Blades: Masked men assault a witness's boat; start *Witness Intimidated* [4]; on fill, your Compromise clock vanishes.
- **Clubs 8** – Short Rations: The Red Span crews strike; Fenwood Stability +1; tag *Pickets at Dawn*.
- **Diamonds King** – Blood Moon on the Belworth: Public panic; all public scenes start one Position lower until appeased.
- **Clubs Ace** – Ghiro's ledger surfaces – shows payments to Seniro's quartermaster; *Contractors* gain *Disgraced* tag; Exposure +3; Mandate +1 for exposing graft.

NPCs at a Glance

- **Constano Fenwood** (heir): careful, pragmatic, favors courts. Wants a durable accord.
- **Seniro “the Red” Fenwood** (marshal): decisive, angry, tempted by force. Wants fear to keep order.
- **Sister Oria** (Lantern-Rites): courteous, iron ritualist. Wants peace kept in the rites.
- **Lady-Envoy Mael Vesht** (Regency): smiling lawyer. Wants leverage for Lence's successor.
- **Captain Pell Rivermark** (Syndicate): superstitious pilot. Wants exemptions and no riots.
- **Master Mason Ghio** (Contractors): perfumed operator. Wants the Red Span forever unfinished.
- **Jaska the Poet** (Restorationists): martyr-maker. Wants spectacle and justice.
- **Duke Braedon Fenwood** (deceased): speaks through his Canray board and a sealed letter. The party may find his final instructions.

Voice & Levers (use in play):

- Constano: “*By hedge-law precedent...*” (Strings: Moot Court access)
- Seniro: “*River justice is steel.*” (Strings: Border patrols)
- Oria: “*Within the lantern’s ring, all are guests.*” (Strings: Hospitality sanctum)
- Ghiro: “*Contracts are like bridges – they only need to hold long enough to collect.*”
- Jaska: “*The dead have voices. We will lend them ours.*”

Rewards, Standing & Fallout

On a public, clean win: convert 3 favors from Lantern-Rites or the Syndicate into **Standing (Tag)**. Grant Audience Tag: *Steady River*. Increase **Mandate +1** (now at least 3). Braedon’s slate fragment – Minor Asset granting +1 die to any roll involving strategy or timing, once per session.

On messy wins: rival Exposure +1 but allied Stability –1. The settlement holds, but someone whispers: “*The Fenwoods won by cheating.*”

On failure: the volatile *Black Scrip* stake triggers – audits, seizures, or arrests. The river stays closed for a season. Set up the next arc.

Running Notes

- **Stay Visible:** Every spend changes the map: a tag, a clock, a dial.
- **Escalate Honestly:** When Crisis climbs, show it: protests, inquisitors, budgets, bans.
- **Reward Face-Saving:** In intrigue, dignity can be worth more than coin.
- **Keep It Human:** Even in a world of rites and spirits, politics is people.
- **Use Strings as positional levers and as victory spoils.**
- **Braedon’s Canray board** can be used as a prop. The GM may reveal that the positions of pieces on his board mirror the political landscape – the last unfinished game of a dying duke.

Quick Prep Checklist

- Print Faction Sheets & Strings (update with Constano, Seniro, and Braedon’s death).
- Mark Mandate 2 / Crisis 2 (or 3).
- Lay Act I clocks: *Contain the Spiral* [6]; *Hotheads March* [4]; *Justice Now!* [4].
- Choose/seed 2–3 likely culprits; plant 3 clue threads.
- Pick 2 scandal prompts to foreshadow (e.g., Clubs 8 *Short Rations*, Spades 7 *Night Blades*).
- Decide which settlement option each faction most desires.
- Place Braedon’s solar as a memory – the party may visit to read his letter (gain a clue or a String).

Integration with *The Old Duke’s Wars*

If the players have completed the vignette adventure *The Old Duke’s Wars*, incorporate the following echoes:

- If they spared the Thornhill child, the ghost haunts the Red Span, granting a one-time +1 die but adding a **Haunted** condition.

- If they exposed Alaysha’s conspiracy, Veralyn’s court is more cooperative – Mandate starts at 3 instead of 2.
- If they executed the Thornhill child, the Restorationists are fanatical – *Justice Now!* counter-clock starts at 2/4 instead of 0.
- If they kept Baldvyn’s letter unopened, the letter contains a secret Aeler clause – the party gains the Keystone Charter asset immediately.

The GM may also allow players to use Braedon’s Canray proverbs as a minor resource: spend 1 Boon to ask for a “Kon’reh insight” – the GM gives a cryptic but actionable clue.

This file presents procedures and a complete adventure. Defer to the Fate’s Edge core SRD for roll math and basic adjudication.
