LARGE Ashes of the Infernal Accord

large An Epic Tier Adventure Module for Fate's Edge

tshape Tier: Epic (220+ XP) Themes: Cosmic Bargain, Infernal Politics, Unreliable Alliances

largeGM QUICK SHEET: AT THE TABLE FLOW

Hook: Maelstraeus offers a deal to stop Mor'iraath's expansion. Accepting grants immediate benefit but +4 **Obligation** to Maelstraeus.

Act I: Descent

tem Journey to City of Cinder (modified travel rules). tem **Early Encounter:** Minor Mor'iraath agent or Livaea's whisper test. tem **Stakes:** Preventing infernal influence spillover into mortal realm.

Act II: The Infernal Bazaar

tem Use **City of Cinder Generator** for locations/encounters. tem **Social Core:** Navigate factions, gather info, make deals. tem **Livaea's Threads:** *Foreshadow early* tempting offers that feel "too good," dreams of perfect outcomes, NPCs oddly fixated on player desires. tem **Key Timers:**tem Mor'iraath's Expansion8 (Stops his plan) tem Cinder Market Stability6 (Prevents city collapse) tem Livaea's Manipulation6 (Reveals her full scheme)

Act III: The Fractured Court

tem Choose approach: Direct Confrontation or Infernal Subterfuge. tem **Livaea's Reveal:** Midtolate act manipulation exposed. tem **Hard Choices:** Complete Maelstraeus' goal (risk his hidden agenda) or defy him (incur wrath).

Resolution: Success = Contain threat + rewards + lasting consequences. Failure = Major front advancement, persistent infernal influence.

largePATRON ENTRY: MOR'IRAATH, THE DEMON OF FIRE AND DESTRUCTION

Lore: Mor'iraath is not merely a lord of flame, but the *principle* of entropic consumption through commerce and conflict. Where Maelstraeus builds webs of interdependence, Mor'iraath seeks to reduce all value to ash. He rules the City of Cinder not through law, but through the inevitability of burnout, the finality of a deal gone wrong, and the allure of power that consumes its wielder. He is the patron of those who would burn the world for profit or pleasure, the ender of cycles, and the devourer of bargains. His sigil is a contract in flames that rewrites itself with each reading.

Patron's Gift (Imbuement): Once per scene as an action (cost: 1 Boon; requires Thiasos), touch an item to imbue it until scene end with +1 Melee and +1 Skirmish or Command (when leveraging intimidation/destruction) (Thematic). Push It: extend for one extra scene by marking +1 Obligation. (Same rules as core Invoker Gift).

Low Rites

tem **Rite of the Burning Ledger (Low):** Duration: Instant; Range: Near;

as an action, you may cause a small, damaging explosion (treat as a hazard, Cap 23, Harm 12) anywhere within the zone. tem **Invoke:** 1 action; mark +1 Obligation. tem **Push It:** Increase the explosion's Cap by +1 and Harm by +1; mark +1 Obligation.

tem **Rite of the Infernal Audit [REVEAL][CURSE] (Standard):** Duration: Scene; Range: Near; Stacking: No.

tem **Materials:** A ledger opened to a random page, held aloft. tem **Effect:** Target must make a Resolve test (DV 3) or suffer 1 die to all actions due to stress/anxiety. On a failure, you learn one hidden financial/legal obligation or secret debt they are trying to hide. If they are currently benefiting from a deal or boon, it becomes [COMPROMISED] or suffers a minor setback (GM discretion). tem **Invoke:** 1 action; mark +1 Obligation. tem **Push It:** The target suffers Harm 1 (Stress) on a failed test; mark +1 Obligation.

High Rites

tem **Rite of the Final Sale [BANISH][UNWARD] (High):** Duration: Instant; Range: Near; Stacking: No. tem **Materials:** A contract signed in the target's blood (or symbolic equivalent) and burned. tem **Effect:** Target a visible Outsider or significant magical effect/ward. Test DV = Cap or Tier. On Hit: add +DV segments to its Leash/Exit Tally or immediately suppress/unravel the effect; on Partial: add +1 segment or apply a minor suppression/setback; on Miss: the contract backfires, apply 1 SB (Spades) to the caster. tem **Invoke:** 1 action; mark +2 Obligation. tem **Push It:** If successful, the target/entity is not just banished/suppressed but *consumed*, potentially gaining a benefit for the caster (like clearing 1 Obligation or gaining 1 Boon), but mark 2 SB (Diamonds) as the act draws the attention of other, potentially more powerful, entities or creates a lingering void/malignancy.

tem **Rite of the Worldfire Gambit [WARD][OMEN] (High Epic Tier):** Duration: Extended (Significant Time); Range: Zone; Stacking: No.

tem **Materials:** A massive bonfire fed by significant symbolic items (wealth, oaths, structures). tem **Effect:** Consecrate a vast zone (like a city district or battlefield). For the next session: All transactions, oaths, and valuebased interactions within are inherently unstable and carry risk. Allies gain +1 Effect to destructive actions but suffer 1 die to cooperative or stabilizing actions. Enemies suffer the opposite. Start a "Consumption Timer " [8] (representing the area's value/energy being burned away). tem **Invoke:** Extended ritual; mark +3 Obligation. tem **Push It:** The effect is permanent (until countered) and the Consumption Timer ticks faster (+1/2 automatically per scene); mark +2 Obligation.

Obligation: Starts at 6 for Tier III characters, scaling appropriately for higher tiers.

Rivalry: Maelstraeus (Obvious Antagonism deals vs. destruction), Livaea (Subtle Manipulation desire can feed or be consumed by fire).

Hard Obligation Triggers (ModuleSpecific):

tem **Obligation 8+ Segments:** A **Silent Collector** arrives to enforce an “emergency clause” in your pact demands an immediate, costly service or marks you as a debtor in default (**GM chooses: +2 Harm, lose asset, or mark permanent Condition**).

tem **Obligation 10+ Segments:** Maelstraeus calls in his debt immediately you must perform a significant service for him *right now*, potentially derailing your current objective or forcing a choice between patrons. Failure risks permanent enmity.

w page

large REGION GENERATOR: THE CITY OF CINDER “THE INFERNAL BAZAAR”

Theme Atmosphere: The City of Cinder is a sprawling, evershifting marketplace built from the calcified remnants of broken dreams and failed ambitions. It exists in the Realm of Fire, where the currency is not gold, but concepts: fragments of soul, moments of joy traded for fleeting power, oaths made in desperation, and the ashes of burntout lives. The architecture is a chaotic blend of grandiose auction houses, cramped pawn shops, and vast foundries where reality itself is bartered. The air thrums with the whispered terms of a million deals, and the ground is paved with the discarded contracts of the damned. Everything has a price, and everything can be bought... for a cost.

(Auction House/Forge/Alley): The Grand Exchange, a vast dome where screams are the bidding currency; The Crucible Foundry, where memories are melted down into ingots of raw emotion; The Alley of Discarded Wishes, where the truly desperate come to trade their last hope.

Quick use notes

tem Draw until you have all four suits: Spade = place, Heart = actor, Club = pressure, Diamond = leverage. Highest rank sets the main Timer (25 ß 4, 610 ß 6, J/Q/K ß 8, A ß 10). tem Diamonds are codified outcomes (rewards/leverages) that change position rather than call for a roll. tem If any A appears, echo fire consumption motifscontracts that rewrite themselves, items that burn without fuel, value that vanishes upon touch.

Additional Features

tem **Value Flux:** The *value* of things (items, information, even people) fluctuates wildly and often illogically. A common pebble might fetch a fortune one moment, be worthless

the next. Social Position and Effect in Cinder are heavily influenced by what the market currently *desires*. tem **The EmberScribe's Eye:** Every deal made in Cinder is recorded. Secrets are commodities. Knowing the right question to ask the EmberScribe (Wits + Lore, DV 4, generates SB) can reveal crucial information, but the knowledge often comes with a price or obligation. tem **Soulfire:** The primary energy source. It burns bright but consumes the user's essence over time. Prolonged presence in Cinder or use of Cinderite magic/assets should tick a "Soulfire Exposure" timer for characters, leading to Fatigue, Conditions, or worse.

Thematic SB Spend Table (CinderSpecific) **Minor Complications (1 SB)**

tem Contractual Snag: A deal you made has a hidden clause revealed at the worst moment. tem Price Spike: The cost of a needed item/service suddenly doubles. tem Market Whispers: Rumors spread about you, complicating social interactions. tem Ember Sickness: Brief Fatigue due to exposure to raw infernal energy. tem Scapegoat Demand: Authorities or a mob needs someone to blame for a recent failure; you fit the description.

Moderate Setbacks (2 SB)

tem Asset Seizure: A valuable item or asset is impounded or claimed by a creditor. tem Debt Collector: A Silent Collector or similar arrives to enforce an old or unexpected obligation. tem Market Panic: A localized crash or surge affects your plans. tem Rival Sabotage: A competing faction or individual actively works against you. tem Identity Theft: Your name/credit is used fraudulently; clearing it is difficult.

Serious Trouble (3 SB)

tem Contractual Trap: You are bound by a deal you didn't fully understand or was misrepresented. tem Soulfire Burn: Suffer Harm 1 (Burn) from overexposure or backlash. tem Major Rival Ascendant: A powerful Cinderite faction gains significant ground, threatening your position/goals. tem Patron's Wrath (Mor'iraath): A direct sign of the Demon's displeasure; immediate complication tied to fire/destruction. tem Timer Tick: Advance a relevant campaign/front timer by 1 segment.

Major Turns (4+ SB)

tem Market Collapse: A significant sector of the City of Cinder fails, causing widespread chaos. tem The Maw Hungers: A district is consumed by the central void, forcing mass evacuation or adaptation. tem Avatar of Destruction: Mor'iraath's Avatar or a major champion arrives to deal with you personally. tem Livaea's Web Tightens: A major manipulation by Livaea is revealed, changing the fundamental nature of the conflict. tem Soulfire Plague: Raw, uncontrolled energy runs rampant, affecting everyone and everything unpredictably.

largeFACTION DEAL TIMERS (DYNAMIC POLITICS)

1. The Ember Merchants' Guild Influence [6]

tem **Tick +1/2**: A successful deal, a new luxury trend, effective lobbying. tem **Tick 1/2**: A scandal, product recall, loss of key member. tem **Fills (Positive)**: Gain +1 die on transactions involving rare/soulfire materials. Their protection makes one Asset or Follower Neglected/Compromised status clear. tem **Fills (Negative)**: They corner the market prices spike, access denied. Start a "Guild Monopoly Pressure [4]" timer affecting the party's operations.

2. The Arena of Wills Champions' Favor [6]

tem **Tick +1/2**: A champion wins a major bout, a gladiatorial spectacle boosts morale. tem **Tick 1/2**: A popular champion is defeated/disgraced, internal disputes. tem **Fills (Positive)**: Gain a temporary Cap 3 PitFighter follower for one major conflict. Allies gain +1 die to Command rolls involving strength/fear. tem **Fills (Negative)**: A champion goes rogue/mad, causing havoc. Start an "Arena Riot [6]" timer threatening a district.

3. The Archive of Regrets' Knowledge Trade [6]

tem **Tick +1/2**: A valuable secret is traded, a historical mystery solved. tem **Tick 1/2**: A forbidden secret is leaked, causing panic or attracting unwanted attention. tem **Fills (Positive)**: Gain one powerful piece of forbidden lore (like a major ritual secret or a vulnerability of a key antagonist) usable once. Clear 1 segment from any Investigation-based timer. tem **Fills (Negative)**: A catastrophic truth is revealed (perhaps about a PC's past or a Patron's true goal), causing immediate Harm 2 (Stress) to one character and starting a "Revelation Fallout [4]" timer.

largeLIVAEA'S FORESHADOWING INTEGRATION

Throughout Acts I and II, weave Livaea's influence subtly:

tem **Early Deals**: An offer appears that perfectly solves a shortterm problem but has vague longterm clauses. If taken, mark 1 SB (Hearts) the "favor" will be called in later under bad circumstances. tem **Dreams/Sights**: Characters might catch glimpses of their deepest desires fulfilled *if they just make one more deal*. These visions are compelling but always show a dark edge upon closer inspection (e.g., ruling a kingdom, but it's built on ash and screams). tem **NPC Behavior**: A seemingly helpful Cinderite NPC becomes oddly fixated on one PC's personal goals or flaws, offering advice that steers them toward Mor'iraath's sphere of influence under the guise of helping. tem **Market Whispers**: Rumors circulate about a "Patron of Perfect Outcomes" or "She Who Grants True Desires" planting the seed that there's another player beyond Maelstraeus and Mor'iraath.

This ensures her reveal in Act III feels like the uncovering of a masterfully laid plan rather than a lastminute twist.
