ŁARGE Fate's Edge

Łarge Tactical Combat Module

Łarge Optional grid-based skirmish rules

Version 2.0 →day

rule

What this module does

tem Adds a grid (square or hex, 5 ft cells) to measure distance, line of sight, and reach.
 tem Introduces movement rates, terrain costs, zones of control (ZoC), and flanking –
 all converted directly into the existing Position ladder. tem All actions resolved with
 standard AttributeSkill pools, , , and Position/Effect outcomes. tem **No HP, no new
 damage tracks.** Harm and Fatigue work exactly as in the core rules. tem Completely
 optional – use for one encounter, a whole campaign, or never.

rule

1 Core Principles

tem **Narrative first.** The grid is a storytelling tool. Every move must be described
 in fiction. tem **No mechanics changes.** Dice pools, , , Position and Effect work as
 written. tem **Predictable tactics.** Cover, flanking, reach and facing give players
 concrete ways to gain Position before rolling.

rule

2 The Grid

2.1 Scale

tem **1 square (or hex) = 5 ft.** Square or hex – pick before session. tem Most
 characters occupy one cell. Large creatures (e.g. horse) occupy 2×2.

2.2 Range Bands (grid version)

Close	Adjacent cells (melee)	1 Core range bands still apply; the grid just
Near	Up to 6 cells (≈30 ft)	
Far	7–12 cells (≈35–60 ft)	
Absent	Beyond 12 cells or off-screen	

4 Zones of Control (ZoC)

tem ZoC = all orthogonal (or all six) adjacent cells. tem **Entering** enemy ZoC ends your movement and places you in melee (Controlled with that enemy). tem **Leaving** ZoC requires a Disengage test: DV 4 (plus any modifiers). Failure leaves you Desperate for your next action. tem **Stacked ZoC**: +1 to Disengage DV per extra enemy. tem **Pushing Through ZoC**: To move through an enemy's Zone of Control without ending movement, make a Skill test (Athletics or Acrobatics) vs DV $4 + (N-1)$, where N is the number of enemies exerting ZoC in the target path. On success, you may continue your movement through the ZoC. On failure, movement ends as normal (entering ZoC places you in melee). *Regardless of outcome, pushing through incurs one cost*: tem **Gain 1 Fatigue**, tem **or GM gains 1**, tem **or your next action suffers Risky (if currently Controlled) or Desperate (if currently Risky)**.

fill(Higher skill ranks improve success chance—veterans thread through chaos where novices falter.)

5 Cover Position

line Partial cover (low wall) Defender gains Controlled against ranged attacks only.

Full cover (solid wall) Defender gains Controlled against all attacks; attacker gains Dominant
line

Cover can be destroyed (GM spends).

6 Flanking Rear Attacks

tem **Flanking**: Two allies on opposite sides of a target (orthogonal or hex). Next attacker gains Dominant for that attack. tem **Rear attack**: Attacker directly behind target. Gain Dominant *and* upgrade Standard to Great for that strike.

7 Weapon Tags (Grid interactions)

rule Tag	Grid Effect
rule [Reach]	Can attack up to 2 cells away (Near). Enemies without Reach suffer -1 Position when trying to close.
[Fast]	After a successful melee hit, shift 1 cell (no ZoC trigger).
[Set]	Plant weapon as an action. Any enemy that charges into that cell (≥ 4 cells straight) triggers an automatic attack at +1 Effect.
[Brutal]	On a hit, push target 1 cell orthogonally. Target's next defensive Position drops one step.
tomrule	

8 Action Economy (Tactical)

Each turn:

tem **One Action** – attack, cast, use skill, activate talent, etc. tem **One Move** – up to movement rate (can be taken before, after, or split around the action).

Exceptions: Dashing uses the Action, no separate attack that turn (unless a talent gives a free attack).

9 Position Sources – Quick Lookup

rule Situation	Position Change
rule Partial cover (defender)	Controlled (ranged only)
Full cover (defender)	Controlled (all attacks)
Flanking (attacker)	Dominant
Rear attack (attacker)	Dominant + Great
Dashing (defender next)	Desperate
Disengage failure (defender)	Desperate
Spend a Boon before roll	Shift Position up one step
tomrule	

All other Position assignments follow the core rules (terrain, surprise, etc.).

10 Line of Sight Concealment

tem Line of sight blocked by solid obstacles (walls, large creatures, dense forest). GM may call for Notice/Stealth if partially concealed. tem Concealment (fog, smoke, darkness) gives the defender Controlled against ranged attacks. Melee unaffected unless attacker must enter the concealed area.

11 Example Turn

tem Harper (Body 4, Melee 5) stands 5 cells from a guard behind a low wall (partial cover). tem Harper dashes 12 cells, ending adjacent (enters guard's ZoC). Guard now Controlled, Harper Dominant for his attack. tem Valeros is already on the opposite side – flanking active. tem Harper attacks at Dominant (flanking bonus). Rolls BodyMelee = 9 dice. tem 6 successes vs DV 3 → clean hit. Harper uses [Brutal] to push the guard 1 cell away, out of cover. tem Guard's next defence is at Desperate (push effect). tem Valeros attacks the now coverless, Desperate guard with [Fast] dagger, shifts 1 cell after the hit.

Dice, Boons, and Outcome matrix untouched; only Position derived from the grid.

12 GM Guidance

tem Draw the grid early – dry-erase board or VTT. tem Read Position first: “What is the attacker’s Position? What can the defender do to change it?” tem Spend on dramatic consequences (cover collapse, reinforcements, etc.). tem Use Boons to upgrade Position – a powerful tactical choice.

A Tactical Combat Cheat-Sheet

labelapp:cheatsheet

A.1 Position / Effect Modifiers

rule Situation	Re- sult
rule Full cover (defender)	Con- trolled; at- tacker gains Dom- i- nant when de- fend- ing.
Partial cover (defender)	Con- trolled vs ranged only.
Flanking (attacker)	Dom- i- nant.
Rear attack (attacker)	Dom- i- nant + Great.
Dashing (defender next)	Des- per- ate.
Disengage failure (defender)	Des- per- ate.
Spend a Boon (before roll)	Shift Po- si- tion up one step.
tomrule	

A.2 Movement

rule	Rule	For- mula
		/
		Cost
	rule Base move	Body
		+
		3
		cells
	Dash (action)	2×
		move,
		next
		de-
		fence
		Des-
		per-
		ate
	Difficult terrain	2
		move-
		ment
linewidth		per
		cell
	Elevation up	+1
		move-
		ment
		per
		level
		(down
		free)
	Run (spend Boon)	2×
		move,
		next
		ac-
		tion
		Des-
		per-
		ate
		(op-
		tional)
	tomrule	

A.3 Zones of Control

rule	Action	Effect
rule Enter enemy ZoC		End movement; in melee (Controlled)
Leave ZoC		Disengage test (DV 4 + modifiers)
linewidth		+1 DV per extra enemy
tomrule		
Stacked ZoC		

A.4 Weapon Tags (Grid)

	rule [Reach]	At- tack up to 2 cells; en- e- mies with- out Reach suf- fer -1 Po- si- tion clos- ing.
	[Fast]	Af- ter hit, shift 1 cell (no ZoC).
linewidth	[Set]	Plant; charge into cell → au- to- matic at- tack at +1 Ef- fect.
	[Brutal]	Push 1 cell; tar- get's next de- fence Po- si-

A.5 Action Economy

rule	Action	Cost
rule	Attack, cast, skill	1 Ac- tion
	Move ($\leq$ move rate)	1 Move (can be split)
	Dash	1 Ac- tion (no other ac- tion)
linewidth	Disengage	1 Ac- tion (or free if tal- ent)
	Use Boon for Position	1 Boon (be- fore roll)
tomrule		

Tip: Declare your tactical advantage (cover, flanking, high ground) before rolling; the GM sets Position based on the board.
