Dragon's Lair

Large A Fate's Edge Supplement

*Where ancient wings blot out the sun, and the earth remembers every claw.
Dragons are not beasts. They are epochs with teeth.*

Introduction

Dragons in **Fate's Edge** are more than apex predators or piles of gold atop a nest. They are:

tem elder sovereignties wrapped in scale and fire, tem tyrants and sages older than cities,
tem walking catastrophes whose slumber shapes continents.

A dragon is a *force of narrative gravity*. When one wakes, kingdoms bend. When one dies, the world changes.

What This Supplement Adds

tem **A complete Dragon Lair Generator** rooms, traps, hazards, ancient puzzles, and living geography. tem **Hoard Generator** treasure worth dying for, and curses worth fleeing from. tem **Named Elder Dragons** unique sovereigns with motives, voices, and agendas. tem **Knightly Orders Gaesea** mortal traditions forged under draconic shadow. tem **Minor Wyrms, Drakes, Cults** lesser terrors and those who worship them. tem **Runekeeper Patron Rules** how mortals gain draconic power without losing themselves. tem **Adventure Seeds Campaign Arcs** lairs that swallow parties whole.

Tone Playstyle

Dragon's Lair is written to support:

tem deadly delves, tem moral and political dilemmas, tem mythic bargains, tem and the uneasy awe of meeting something older than hope.

This is not a bestiary update. It is a **mythic escalation**. A dragon is a rival kingdom, a natural disaster, and a thinking god.

Using This Book

Each section stands alone, but together they let you:

tem build lairs on the fly, tem create new dragons with rules and personality, tem tie entire campaigns to a single ancient sovereign.

No two dragons are the same. Every lair breathes. Every hoard has a history.

When you enter a dragon's domain, remember:

**It is not the dragon's home.
It is the world that belongs to the dragon.**

subsection Cult Anatomy

A Dragon Cult is built from three pillars:

tem **Myth Engine** (what story powers it) tem **Scarce Rite** (what only initiates can do) tem **Territorial Claim** (where its influence holds)

At the table, a cult is treated like a slowmoving faction with a *Public Face*, *Inner Knives*, and a *Hidden Egg*.

The Ancient Wyrms (Primordial Sovereignty)

labels:subsec:patronwyrms dex:Patrons!Ancient Wyrms dex:Runes!Draconic

Symbol: A spiral of seven scales encircling an empty eye. **Epithets:** The Crowned Flames, First Sovereigns, The Hoard Unending, The Living Citadels. **Nature:** Any wyrm of sufficient age and will may forge a pact. Each bond is unique, sealed in molten speech and unbreakable oath. Dragons do not choose lightly: to grant runes is to acknowledge a mortal as *kin by fire*.

Doctrine:

tem Power is owed only to power; tribute is proof of worth. tem What is taken must be paid for in gold, in oath, or in blood. tem Knowledge is treasure; hoards guard secrets, not merely gold. tem A promise given in a dragon's presence is a chain in the soul.

Pact Price (Obligation):

tem Protect a treasure (object, name, land, or secret). tem Enforce a vow sworn by others. tem Extend the dragon's influence: fear, tribute, renown. tem Once per season: deliver a worthy offering.

Refusing a demand marks +2 Obligation. Betrayal awakens the wyrm.

Runekeeper Notes

tem Every dragon grants different Rune "accents" a frost wyrm's breath freezes; a desert wyrm's voice scorches the soul. tem Using Rites against a dragon is not betrayal, but *challenge*; most elders approve. tem A Runekeeper who dies with honor may have their name placed in the Hoard, becoming a draconic ancestor's spirit.

Boons Complications

tem Spend 1 Boon to speak any mortal language with draconic authority. tem Gain +1 Corruption when hoarding wealth without purpose. tem While wearing metal, you leave faint scorchmarks where you step. tem Children stare. Horses bow. Priests tremble.

Tone: This Patron lets any ancient dragon act as a cosmic power without naming or binding the GM to a specific entity. Each wyrm interprets the pact differently some demand gold, others secrets, others worship. The Runekeeper becomes a herald, tax collector, prophet, or enforcer depending on culture and dragon.
