

# **Fantasy City Expansion: Violets & Stone**

(Fate's Edge v1.0)

A plug-and-play urban module for Fate's Edge campaigns set among bridges, aqueducts, rites, caravans, and crown politics.

---

## DESIGN GOALS

- **City as character.** Districts and institutions carry tags, Strings, and clocks that push back.
  - **Plug into core.** Use Position/DV, SB, and clocks; no new dice math.
  - **Street to state.** Blend casework, capers, and civic settlements.
  - **Low bookkeeping.** Track names and tags; let clocks and Strings carry weight.
- 

## QUICKSTART (2 MINUTES)

1. Pick a City Kit (§7). Set Mandate 2 / Crisis 2 unless fiction says otherwise.
2. Choose 4 Factions from the kit; copy their Strings; start each faction's Influence or Agenda clock at 0.
3. Mark 2 volatile stakes on the relationship map (e.g., "Harbor Master owes Corsairs a favor").
4. Draw the Urban Deck (§6.2): one Incident (Spade), one Person (Heart), one Complication (Club) to spark the opening dilemma.
5. Frame the first Situation Clock [4–8] and at least one Counter-Clock [4–6].
6. Play scenes. All 1s generate SB; spend city-flavored Social SB (optional, see §3.4).

**Pro Tip:** Start with the Three-Clock Rule – only track the Situation Clock, one Counter-Clock, and one Campaign Clock at a time.

---

## 1) CITY SHEET (TEMPLATE)

### [CITY NAME]

Mandate (0–6): public legitimacy of the company in this city

Crisis (0–6): ambient pressure (riots, audits, plague, war drums)

Districts (5–8): each with tags & a District Effect (see §2)

Institutions (3–6): councils, courts, guilds, rites; each has Strings

Factions (4–8): playset; use Influence / Stability / Exposure clocks (see §7)

Relationship Map: arrows with stakes; mark two volatile

Rites & Laws: 1–2 citywide oaths, bans, or permissions that change Position

Chase Modes: foot, canal, rooftops, alleyways (see §5)

Events: festival/omen/weather tables (see §6.3)

## District Effect (per scene)

Acting with a district's tags → Position +1 or DV -1 once/scene. Acting against a district's tags → Position -1 or GM banks +1 SB. Whenever a player rolls a 1 in a district, the GM may tick that district's Complication clock (if any) by 1.

---

### 3) CITY PROCEDURES

#### 3.1 Scene Framing

State the question; pick a Situation Clock; set Position & DV from fiction + district effect; start a Counter-Clock if opposition is active; tag the venue (Audience/Institution).

#### 3.2 Strings (Urban)

Common Strings: Bridge Tolls, Aqueduct Permits, Ferry Passbooks, Oath-Tablet Registry, Harbor Pilots, Festival Licenses, Censor's Seal, Ship Papers, Privateer Charters, Contraband Manifests.

Acting with/through a relevant String: Position +1 or DV -1 once/scene. To cut or seize a String, start a 4-6 segment clock. On completion, you may:

- **Seize:** Gain control of the String for your own use.
- **Destroy:** Prevent anyone from using it.
- **Redirect:** Change who controls it (e.g., assign to a different faction).

*Example:* Cutting the String *Harbor Warrants* [4] – on success, you either obtain legitimate papers or prevent the harbor from issuing warrants against you.

#### 3.3 City Dials (Mandate & Crisis)

- **Mandate (0-6)** – public legitimacy. At 4-5, cancel one Social SB in public venues once/session; public offices DV -1. At 6, start public scenes Dominant unless fiction forbids.
- **Crisis (0-6)** – ambient pressure. At 4-5, first failed public scene ticks party Exposure +1; at 6, start with a crowd Counter-Clock [4].

At the end of each session, if total SB spent by the GM exceeds 10, increase Crisis by 1. If the party successfully resolved 2+ major clocks, increase Mandate by 1.

#### 3.4 Social SB Menu (optional, city-flavored)

Instead of the generic SB menu (noise, alarm, etc.), GMs may choose from these urban complications:

- |                                        |                    |
|----------------------------------------|--------------------|
| • Faux pas title/ritual                | • Festival crush   |
| • Lose 1 Favor in venue                | • Toll chain drops |
| • Leverage leak → Exposure +1          | • Ship quarantine  |
| • Crowd turns (Warm→Skeptical→Hostile) | • Cargo inspection |
| • Permit pulled (lose String access)   | • Guild audit      |
| • Patrol arrives biased                | • Noble scandal    |

- Temple censure
- Watch curfew
- Harbor closure
- Price fixing
- Counterfeit goods
- Debt collector
- Bounty hunter
- Informer betrayal
- Rival sabotage

### 3.5 Investigation Clock Management

For long-term mysteries, use an **Investigation Clock** [6]. Each significant clue advances the clock by:

- Clue Grade D or C  $\rightarrow +1$
- Clue Grade B or A  $\rightarrow +2$
- Clue Grade A+  $\rightarrow +3$

When the clock fills, the GM describes the complete truth – but also introduces a new complication (e.g., the culprit escapes, evidence is destroyed, or a powerful figure is implicated).

*Example progression:* Clue D (1)  $\rightarrow$  Clue C (1)  $\rightarrow$  Clue B (2)  $\rightarrow$  Clue A+ (3) = 7 segments  $\rightarrow$  truth revealed, but the villain has already fled.

### 3.6 Between-Session Cycle

Update world state  $\rightarrow$  draw events (§6.3)  $\rightarrow$  resolve off-screen orders  $\rightarrow$  recompute Mandate/Crisis  $\rightarrow$  prep next Situation.

## 4) URBAN ACTIONS (ADDITIONS)

- **Invoke Rite (Wits/Presence + Rite):** Claim hospitality, sanctuary, or festival privilege. Hit: protective tag; miss: Exposure +1.
- **Grease Palms (Wits + Streetwise):** Secure permits/tolls. Hit: tag *Greased Palms*; miss: rumor of bribery (Exposure +1).
- **Audit Ledger (Wits + Investigation):** Catch graft/tithe anomalies. Hit: DV -1 on later Expose.
- **Call the Watch (Presence + Command):** Leverage order. Hit: *Watchful Patrols* tag; miss: they arrive biased.

---

## 5) CHASES IN TIGHT STREETS (DV LADDERS)

Pick a mode; on a hit, advance Pursuit (or Escape) clock by Effect (1–3).

| Mode         | DV 2        | DV 3          | DV 4          | DV 5               |
|--------------|-------------|---------------|---------------|--------------------|
| Foot         | market      | alleys        | rooftops      | through procession |
| Boat/Canal   | open run    | under bridges | against tide  | fog storm          |
| Mount/Cart   | quay road   | wagon traffic | stair-streets | temple steps       |
| Ship-to-Ship | calm waters | choppy seas   | storm winds   | naval battle       |

**Complications (on 1s):** overturned barrow, toll chain drops, lantern goes out, festival throng, rigging tangles, hull breach, powder keg, enemy boarding party, reef strike, sudden fog, cargo shift, crew mutiny.
